AGENDA

X3J16 Meeting No. 23
WG21 Meeting No. 18
March 10-14, 1997

This meeting falls in a "quiet" period during the ANSI public-comment period, and during the ISO CD balloting period. We are not allowed to make any changes to the draft itself, but we can and should address known problems for later correction. In particular, we will address the ANSI public comments received, ISO National Body comments (if any have been received), and any other issues members wish to bring forward. We must keep in mind that major changes to the draft would probably prevent adoption of the CD as the Draft International Standard.

Please note that we have reverted to our normal daily schedule. (In Hawaii we worked a half-hour earlier than normal.)
